

THE BADGER. THE ATTITUDE. THE COIN.

ROADMAP 2026

BUILT WITH CHARACTER.

An original honey-badger character. A growing world.
A community built around grit, wit, and unmistakable MADGER energy.

THE BURROW IS LIVE.

REFINED EDITION / 03 SEP 2026

01 / THE PROJECT

A character worth building around.

MADGER is a character-led project on Solana, combining a distinct visual world, cinematic storytelling, field notes, and a contributor community.

01

Identity

An unmistakable honey badger. One approved likeness. A coherent world across every release.

02

Open record

Official links, token details, launch evidence, and material decisions that people can verify.

03

The Burrow

A community shaped by stories, useful work, shared standards, and constructive participation.

THE MISSION

Build a durable contributor community, publish original media, and communicate decisions clearly. Expand MADGER through carefully evaluated products and experiences, with the character and community at the center.

THE STANDARD

Persistence over panic. Humor without toxicity. Community over manufactured influence. Transparency over fake hype. Brand value before short-term promises.

02 / TOKEN FRAMEWORK

The public record.

Project-published facts checked against the official launch record and litepaper on September 3, 2026. Live records take precedence over this snapshot.

NETWORK **Solana**	TICKER **$MADGER**
SUPPLY **1,000,000,000**	DECIMALS **6**
TRANSFER TAX **0%**	TOKEN PROGRAM **Classic SPL Token**
MINT AUTHORITY **Revoked**	FREEZE AUTHORITY **Revoked**

OFFICIAL SOLANA MINT / COMPARE EVERY CHARACTER

TRADING LIVE

The project lists a MADGER / SOL market on Raydium. Its launch record publishes allocation and transaction evidence. Liquidity-protection evidence remains pending; do not interpret wallet labels as protocol-enforced locks.

Source: token framework / litepaper

03 / ROADMAP

The Burrow, built in stages.

Four operating stages. Progress should be evidenced by delivery, not implied by a calendar or market activity alone.

01

FOUNDATION

Establish the identity, website, token record, core documents, and recognized communication channels.

Evidence: approved assets and accessible, consistent public sources.

02

READINESS

Close approval checks, document venue and liquidity mechanics, and maintain one authoritative action guide.

Evidence: current launch record, reconciled records, and open risks.

03

DISTRIBUTION

Build repeatable publishing, education, collaboration, and community-operations programs.

Evidence: released work, defined contributor scopes, and useful feedback.

04

EXPANSION

Evaluate merchandise, media, games, collectibles, licensing, and payments through small, controlled tests.

Evidence: feasibility review, pilot learning, and an explicit go/no-go decision.

Evidence criteria are proposed execution guidance, not claims of completion. Timing depends on approvals, resources, security, and feasibility; no dates or outcomes are guaranteed.

04 / DISTRIBUTION

Turn the character into culture.

Build a repeatable cycle of original work, useful information, and community participation. Keep the record accessible after the timeline moves on.

01 **PUBLISH**

Editorial releases, character stories, cinematic work, field notes, and concise project updates.

02 **EDUCATE**

Clear explanations of official information, verification practices, and project mechanics.

03 **COLLABORATE**

Defined scopes for artists, writers, editors, moderators, developers, and other contributors.

04 **SUPPORT**

Recognized channels, responsible moderation, and practical protection against impersonation.

05 **LEARN**

Review released work and community feedback; refine the next cycle without diluting the identity.

BRING VALUE. KEEP RECEIPTS.

Proposed working standard: document scope, permissions, compensation, incentives, and expectations before substantial commissioned work begins.

05 / EXPANSION

Build carefully.
Keep the likeness exact.

Potential directions, not announced products: merchandise, media, games, collectibles, licensing, and payments.

PROPOSED REVIEW FRAMEWORK

Value & feasibility

What does this add to The Burrow, and can it be delivered with available resources?

Security & compliance

What could expose people, assets, or the project to harm? What review is required?

Accessibility & operations

Can people use it, and who will maintain, support, and communicate it?

Identity & permissions

Does every visual preserve the approved likeness, and are the rights clearly documented?

ONE MADGER. NO SUBSTITUTES.

Use approved source artwork. Preserve the face, markings, expression, proportions, and signature fang. New visual concepts must meet the same identity standard before release.

06 / SECURITY & RISK

Protect the Burrow.

Verification is a habit, not a one-time check. Begin with the official website and follow its published routes.

01 **Bookmark the official domain.**

Use madgercoin.com as the starting point for channels, mint details, and market records.

02 **Compare the entire mint.**

Check character by character before trusting a listing, wallet prompt, bot, or third-party post.

03 **Read every signature request.**

Understand the permissions being requested before you approve anything.

04 **Treat urgency as a warning.**

Unsolicited DMs, surprise wallet requests, and fake support accounts are not official evidence.

05 **Keep secrets private.**

Never share seed phrases, private keys, passwords, or authentication and recovery codes.

RISK DISCLOSURE

Crypto assets can be volatile, illiquid, technically complex, and vulnerable to fraud or total loss. MADGER offers no guarantee of income, appreciation, capital preservation, liquidity, listing, or future utility. This is project information, not financial, legal, or tax advice.

07 / OFFICIAL SOURCES

Verify the source. Then act.

Use the living record for current facts. This roadmap describes direction; it does not replace launch evidence or official announcements.
