Inside the Burrow

Materials and light study. The measured plan on page 3 controls geometry and scale.

ONE PLACE. EVERY STORY.

A home worth returning to. A world worth defending.

Fixed geography, lived-in places and a shared foundation for animation, stories and the video game. Adventures add history to the Burrow without moving it.

FOUNDATION v1.0.0 / 19 OCTOBER 2026 / WORLD OWNER: JAMES RAYMOND DEAN

The canon agreement

This edition establishes the interior baseline. New details here are deliberate world development, not claims of earlier approval.

C01 / One shared place

Every episode, game hub and story illustration references the same location IDs, compass directions, routes and landmark relationships.

C02 / Permanent base, recorded change

Geography and built footprints form the baseline. Weather, repairs, new occupants and event damage belong in dated state overlays. Growth adds entries; it does not silently redraw the base.

C03 / Inside means inside

Episode 1 camera centers, visible ground and character actions remain within the inhabited basin and inside the East Gate exterior plane. Sky above the opening is allowed; exterior roads, landscapes, attackers and exterior cutaways are not.

C04 / Care has ordinary causes

Food, water, repairs and safety come from neighbors and working infrastructure. No magic lantern, universal energy core, or secretly indispensable hero sustains the town.

C05 / Trust can be checked

A message is evidence of a report, not proof that an event occurred. Digital, physical and personal observations can disagree.

C06 / The four remain themselves

Madger, Gorilla White, MADGER Bot and Snow White retain their established designs and approved voices. Snow has canine sounds only. No duplicate hero mascots as anonymous crowd fillers.

C07 / The pilot earns its warmth

Show skill, generosity, play and ordinary friction before clues. No pilot attack, named villain reveal or retroactive sabotage of the repaired bridge.

C08 / No convenience architecture

A chase may use an existing route or a newly documented extension. It cannot conjure a door through a previously solid wall or change which side of the canal a building occupies.

C09 / Same environment, different presentation

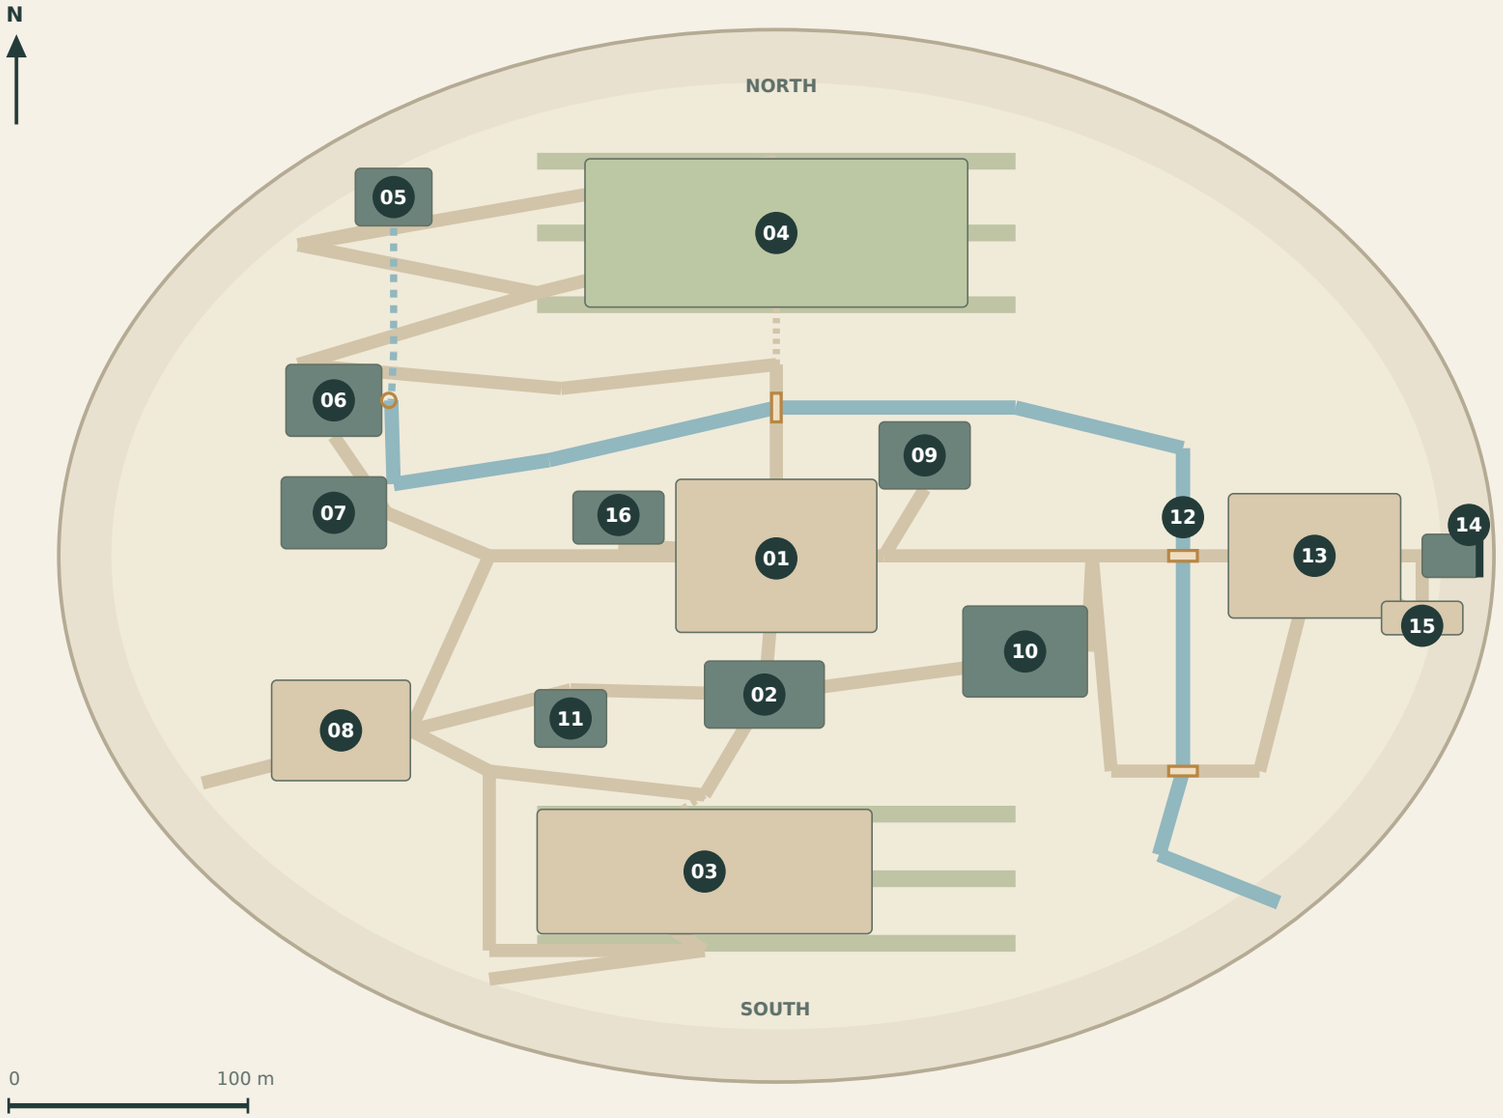

Anime may use painted linework and game assets may use 3D meshes. Their scale, silhouettes, sign placement, doors and travel connections agree.

C10 / Unknown is not permission to improvise

External lands, undisclosed tunnels and unnamed NPC biographies remain unassigned. Define and record them before using them as plot facts.

The permanent interior map

North-up master plan. Numbered footprints, routes and crossings use the same coordinates as the accompanying JSON.

01 Sunwell Market
02 Common House & Tables
03 Hearth Terraces
04 Garden Terraces
05 Spring House
06 Waterhouse
07 Gorilla White's Workshop
08 Training Court
09 Records House
10 Storehouse & Trading Court
11 Care House
12 East Bridge
13 Inner Arrival Court
14 East Gate
15 Service Walk & Gate Relay
16 Makers' Room & Archive

600 x 440 m planning envelope. Sunwell is (0, 0, 0). 1 unit = 1 metre.

Dotted blue: enclosed headrace.
Blue: open utility canal.
Pale paths: public routes.
Three fixed canal crossings.

Scale, levels and believable travel

The sky is above the Burrow. All inhabited ground, galleries and pilot viewpoints remain inside the limestone basin.

Diagram: north-south section. Vertical scale exaggerated for clarity; anchor elevations remain exact.

A compact town, not a tiny room

About 400 residents live on several tiers around a 600 x 440 m basin. The +54 m rim encloses a broad opening; most occupied terraces sit at +6, +12 and +18 m. A warm season does not remove the need for drains, ventilation and sheltered galleries.

Access has a route

Stairs are shortcuts. Longer ramps reach the occupied terraces. Keep the southern Service Crossing available when East Bridge is closed for maintenance. Do not draw a new crossing to shorten a scene.

Sunwell to inner gate - 288 m / about 4.8 min

common tables to Service Walk - 321 m / about 5.4 min

Sunwell to workshop - 167 m / about 2.8 min

Sunwell to gardens - 136 m / about 2.3 min

Sunwell to home entry - 168 m / about 2.8 min

Planning pace: 1 m/s, with stops and crowding additional. Five minutes of screen time can contain a full day through clear ellipses.

Sunwell and the common table

01 Sunwell Market

The civic center: daily exchange, news and informal decisions.

- Round limestone well curb at the world origin; sealed potable-water draw point, never an energy core.
- Four dark inset paving rays mark north, east, south and west.
- Green canvas stalls occupy the north and west edges; the east route stays clear.
- A freestanding timber noticeboard stands at (18,20,0).

Everyday life

Produce arrives before breakfast. Neighbors trade repairs, food and information. A returned tool matters as much as a sale.

Story / play

Let the community solve ordinary problems here. A future false notice has recognizable recipients and consequences. Home hub, dialogue, noticeboard quests and map orientation. No random hazards in the peaceful baseline.

Continuity lock

Keep the center open. Stalls move only within marked bays. Never mirror the paving compass or move the well.

02 Common House & Tables

A communal kitchen, shared meal room and meeting place open to the market.

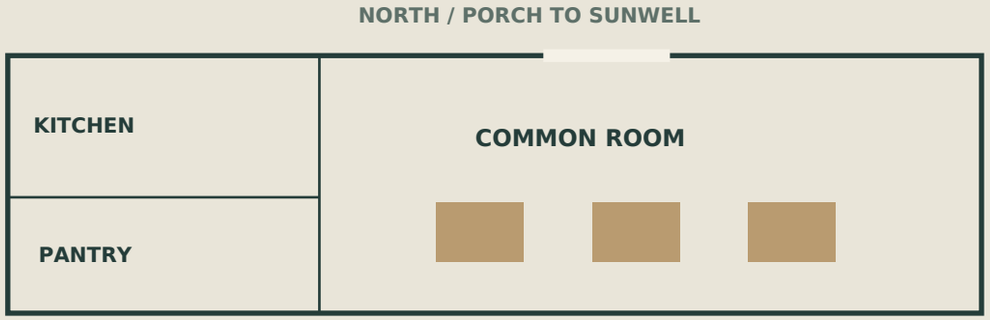

- Long north-facing porch; three permanent stone table bases in its forecourt.
- Warm plaster, green shutters, copper kitchen vent on the southwest corner.
- Four friends usually sit at the eastern porch table; it is not privately reserved.

Everyday life

Households have their own kitchens. This kitchen serves workers, visitors and shared meals; no one must earn food through heroics.

Continuity lock

Do not turn the forecourt into a different plaza. Seasonal cloths and food are state changes.

Room relationships fixed; 50 x 28 m building envelope.

Homes, privacy and care

03 Hearth Terraces

The principal residential neighborhood, built into the southern rock.

- Three inhabited tiers at +6, +12 and +18 metres.
- Pale stone lower walls, dark timber balconies, slate roofs and individual colored doors.
- Madger and Snow share the ground-level accessible home entry at the west end of the +12 m terrace.

Everyday life

Laundry, school bags, meals, repairs and quiet hours make this a neighborhood rather than a backdrop.

Story / play

Private thresholds give friendships boundaries. Residents have plans independent of the heroes. Home save point and optional conversations. Occupied homes are not loot containers.

Continuity lock

This edition fixes neighborhood massing and Madger/Snow entry, not every unseen room or every resident name.

Home entry belongs to the mapped +12 m gallery. Room details beyond the entry are added as a named location sheet before first use; the entire neighborhood is not a single enormous house.

11 Care House

A quiet neighborhood clinic and recovery space.

- Cream shutters, a simple blue circle sign and a planted waiting porch.
- Two rest rooms behind the reception area.

Everyday life

Ordinary checkups, rest and help for injuries; care does not depend on game rank.

Story / play

Consequences and recovery have a place, without turning every danger into spectacle. Recovery and rescue handoff. Actual story injuries follow the event ledger.

Continuity lock

Do not replace it with a prison, armory or secret lab without an explicit canon revision.

The gardens and the spring

04 Garden Terraces

North terraces for produce, plant starts and shared learning.

- Three broad planted bands at +6, +12 and +18 metres.
- Two low greenhouses sit at the eastern end of the +12 m terrace.
- Garden crossing BRW-C02 links the lower path to Garden Way.

Everyday life

Growers share water schedules. Greens, roots and fruit supplement traded grain; gardens do not magically feed everyone alone.

Story / play

A future changed delivery schedule can cause a missed watering without threatening the whole town at once. Cultivation, observation and soil-route tutorials in designated beds only.

Continuity lock

No new cliff or waterfall between tiers. North remains north in every season.

05 Spring House

Protected source, settling tanks and the start of separate water systems.

- Low limestone vault built into the northwest wall.
- Three labeled valve wheels inside; a fenced settling court outside.
- Drinking-water tanks are covered; the utility race is visibly separate.

Everyday life

A water team checks clarity and flow physically and records the result before opening the daily allocation.

Story / play

Careful work becomes familiar before any later attempt to falsify it. Inspection puzzles and valve routing with a local effect; never a universal town-off switch.

Continuity lock

No bathing or dumping in potable tanks. Water flows downhill along fixed routes.

Ecology lock: planted limestone terraces, familiar temperate vegetation, garden birds and a maintained water system. Seasons change crops and light. They do not swap the town into a different biome.

Working hands, working systems

06 Waterhouse

Water-driven power and maintenance beside the western wheelrace.

- One 6 m diameter vertical waterwheel on the east wall.
- Separate mechanical sluice and electrical isolator.
- Wheelrace runs on the building's east side; the workshop stands south.

Everyday life

Operators clean grates and compare local gauges; nearby roofs add solar power and local batteries.

Story / play

Local consequences create practical rescue and repair stories later. Environmental repair and supervised mechanisms. No unrestricted control of the entire settlement.

Continuity lock

The wheel never migrates to the gate or north gardens. Power and drinking water remain independent.

Wheel location: east wall of Waterhouse, north of the workshop. The enclosed headrace comes down from the spring under the western garden ramp; the open canal begins beside the wheel.

07 Gorilla White's Workshop

A public repair workshop where Gorilla White works alongside other craftspeople.

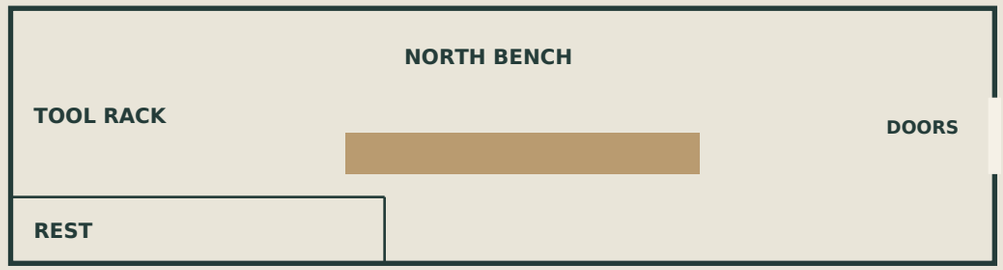

- Wide east-facing pair of timber doors.
- Big shared bench beneath north windows; blue tool silhouettes on the west rack.
- A small private rest alcove is behind the south partition, never in the public tool aisle.

Everyday life

Repair tickets are public. Apprentices do real work. Gorilla accepts help and takes turns being off duty.

Continuity lock

No weapon factory in the peaceful baseline. Shelves may gain tools; walls and doors stay fixed.

44 x 30 m envelope / east entrance / waterhouse to north.

The east threshold

12 / East Bridge

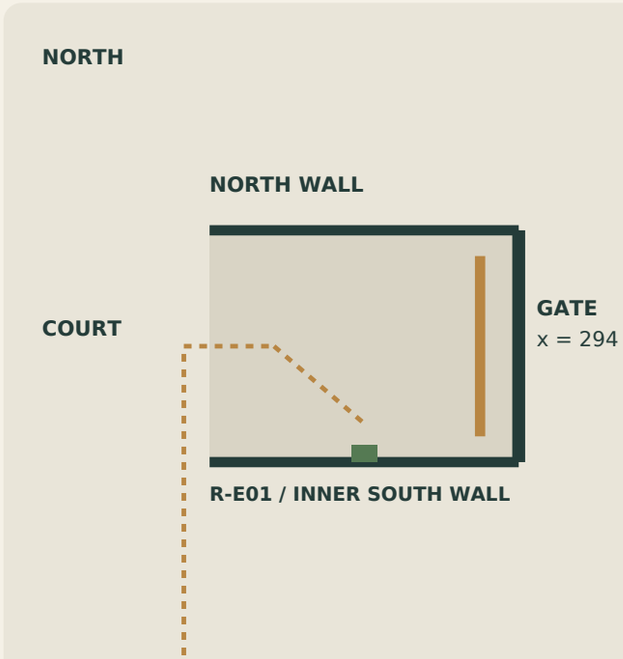

The main public crossing between Gate Lane and the interior arrival court. 12 m east-west deck over a 6 m north-south canal; low stone abutments. No collapse, sabotage reveal or large arched stone replacement in the pilot.

13 / Inner Arrival Court

An internal handoff space between East Bridge and the closed gate vestibule. Open paved court, shaded waiting bench on the north and two marked cart bays. No view past the exterior threshold in Episode 1.

14 / East Gate

A recessed gate vestibule and the main public threshold at the east rock wall. Twin timber-and-iron gate leaves at x=294. Closed does not mean the entire Burrow has no other emergency provision. Exterior geography remains unassigned.

Dashed path enters the open west mouth, then turns right.

A readable threshold

The exterior leaves sit at x=294. Inside them, the crossbar remains a physical object. The relay is mounted on the inner south wall: the right side when facing east. Enter the vestibule through the west mouth to reach it.

Records, receiving and the quiet clue

09 / Records House

Bot's workroom, local records and the room where evidence is compared.

People can correct records and ask how a decision was made. Bot helps; he does not own everyone's information.
A public counter at the south; comparison table in the center.

10 / Storehouse & Trading Court

Dry staples, tools and an interior receiving yard.

Outside trade supplies grain, cloth and spare parts. The shared reserve buffers interruptions; households keep personal supplies.
Raised dry floor, numbered shelves, reusable D-series delivery tags.

Evidence rule: the receipt anomaly and Snow's physical observation are separate facts. Neither proves an attacker, a method or a connection. Preserve uncertainty until a later story earns an answer.

15 Service Walk & Gate Relay

Public maintenance access along the inner south side of the gate.

- Slate paving, one shallow drain and one inspection hatch at (264,-26,0).
- Cabinet R-E01 mounted at (282,-8.5,1.2), on the vestibule's south wall.
- Cabinet door is flush and intact in the pilot; its display uses ordinary muted green.

Everyday life

Maintenance is scheduled and logged. The place is mundane before Snow notices an unfamiliar trace.

Story / play

A held indication and recorded time create a question; the source remains unknown. Inspection, local relay isolation and evidence comparisons in later missions.

Continuity lock

Never move the cabinet to the north wall. Never imply Snow can smell a digital hack.

Practice, creativity and shared memory

08 Training Court

A safe, open practice yard with marked soil lanes and rescue exercises.

- Low timber boundary on three sides; east entrance stays open.
- Two sand/soil strips, reusable wooden obstacles and a rope-rescue frame.
- Soft soil lane A runs north-south inside the court; buried utilities are outside its bounds.

Everyday life

Children practice coordination; adults rehearse carrying and rescue. Training is scheduled around rest hours.

Story / play

A place for effort, humor, failure and gradual competence before a real emergency. Jump, guard and BURROW tutorials. Down/S/down-swipe/BURROW retain their established behavior.

Continuity lock

Digging is allowed only in defined soil volumes; never phase through stone, homes or pipes.

16 Makers' Room & Archive

A shared studio, reading room and record of community projects.

- Ochre door facing south, long north worktable and east archive wall.
- Displayed objects have credited makers and recorded histories.

Everyday life

Neighbors draw, record stories, learn skills and mend small objects. Celebrations add dated artifacts.

Story / play

A living memory of past adventures without inventing ancient prophecy. Creator Studio and Trophy Chamber functions share this building; neither becomes an extra wing by accident.

Continuity lock

No unrecorded trophy from an adventure the characters have not had.

New history accumulates here. A repaired object, drawing or thank-you can return in later episodes with the same date, maker and story attached. A trophy is not evidence of an adventure until that adventure is in the event ledger.

How the Burrow lives

A community of neighbors

The settlement includes established human and animal people; ordinary companion animals remain distinct. Background residents have jobs, households, different ages and their own concerns. The four heroes are singular characters, not a crowd template.

How it grew

Families and craftspeople expanded a practical waystation around the spring. Success came through building, trade and repair. No secret royal bloodline or ancient civilization is needed to explain why it works.

Decisions and responsibility

Residents choose a rotating maintenance council and task leads. Public works and reserve supplies are recorded; people can question a plan. The heroes participate and can be overruled. New named officials require character entries.

Personal space and shared work

People keep homes, tools and private belongings. Public resources have stewards. Help is valued, but exhaustion is not the price of belonging. The community is capable even when the heroes are elsewhere.

Dawn

Water checks, shutters open, breakfast and garden work. Quiet voices carry along the galleries.

Morning

Deliveries, repair jobs, lessons and market business. Paths show workers going somewhere specific.

Midday

Shared meals and shade. Most people eat at home or work; a large common meal marks an occasion.

Afternoon

Trade, practice, repairs and play. A cart can wait while a neighbor finishes crossing.

Evening

Tools return, records are reconciled, windows warm and the gate closes. Late work still has people responsible for it.

Small tensions

A repair takes too long; two groups want the same table; someone feels unheard. Resolve such friction through character choices. Prosperity is credible because it includes ordinary disagreement.

What keeps the town running

Food and trade

Gardens and greenhouses supply fresh produce. Grain, cloth and spare parts arrive through trade. Storehouse reserves buy time during delays; they are finite. Friendly traders remain welcome.

Water and waste

Covered spring tanks feed buried potable pipes. The enclosed headrace serves the wheel and then an open utility canal. Sewage stays in sealed lines to southeast treatment access. These flows are never interchangeable.

Power

Water-driven generation, modest rooftop panels and local batteries feed separate neighborhood circuits. Manual isolation and ordinary backup lighting prevent one failed sensor from darkening every home.

Physical entry

Gate stewards operate the leaves and bar. Arrival records support their work. A valid-looking acknowledgment cannot move a mechanical crossbar by itself.

Messages and records

Relays carry schedules, notices and local reports. Records House compares them with paper tags, local instruments and people's accounts. There is no universal machine that sees or controls everything.

Maintenance and failure

Assign every failure a source, a local effect, a person who notices and a fallback. A garden valve fault affects that branch; a false delivery message can waste a trip. Consequences should match the actual system.

What future enemies can threaten

The central conflict

How can an open community defend itself against attackers who exploit its trust while remaining a place people want to live? Defense must protect meals, safe paths, relationships and the freedom to ask questions.

Plausible pressure

Later adversaries may falsify a notice, replay an acknowledgment, misdirect supplies, impersonate authority or tamper with a local device. Each act needs access, limits, evidence and a cost. No remote magic that ignores the architecture.

Different observations matter

Madger listens and organizes; Gorilla checks physical conditions; Bot compares records; Snow notices physical changes. Neighbors supply context. A solution should require useful contributions from more than one source.

Defense without occupation

Watch routes, staffed thresholds, drills, local alarms and manual fallback are normal civic habits. No automated lethal defenses in the peaceful home baseline.

The three pilot clues

1. Two receipts for one cart.
2. Snow indicates an unfamiliar physical trace beside an intact cabinet.
3. Another acknowledgment appears at the closed, empty gate.

The cause, actor and relationship between these observations remain unset.

Story boundaries

Do not reveal an attacker, cut to a villain's control room, label the bridge repair as sabotage or use ominous lighting on every ordinary device. The good day really happened. Later episodes must earn the threat.

Four lives within one home

Madger

Belongs: Sunwell, Common House and the shared home at Hearth Terraces
Gift: Initiative, courage and a talent for bringing people together.
Friction: Mistakes taking every job for being dependable.

Pilot step: Accepts a neighbor's plan, shares the work, gives away credit and stops to listen to Snow.
Long arc: Learns that leadership means building a capable community, including disagreement and checks on his own judgment.

Gorilla White

Belongs: Workshop, Waterhouse, bridge and common tables
Gift: Patience, strength, workmanship and an instinct to shield others.
Friction: Carries the burden alone until everyone mistakes his endurance for invulnerability.

Pilot step: Lets neighbors help and sits down for the meal.
Long arc: Builds others' skill and trusts a team to protect him as well as the town.

MADGER Bot

Belongs: Records House, relay cabinets and maintenance routes
Gift: Memory, method and a sincere wish to make daily life easier.
Friction: Feels that being useful requires having a definite answer.

Pilot step: Keeps the duplicate receipt and admits that its cause is not yet known.
Long arc: Trusts independent observation, states uncertainty and protects people without taking over their decisions.

Snow White

Belongs: Shared home, common tables, training yard and walks with the team
Gift: Scent, hearing, attention, affection and decisive physical action.
Friction: An exciting sensation can pull her ahead before others understand.

Pilot step: Stops, looks back and holds an indication until Madger joins her.
Long arc: Develops reliable teamwork through indication, return and restraint; does not gain human speech.

The visual grammar

Silhouette before detail

A broad limestone bowl; low central buildings; occupied terraces climbing the north and south; a working wheel on the west; a modest, recessed gate on the east. No tower, giant crystal or fortress suddenly dominates the silhouette.

A practical building family

Stone foundations, pale plaster, dark timber galleries, slate roofs, canvas shade and restrained copper fittings. Civic signs are simple and readable. Shared construction methods coexist with personal doors, plants and repairs.

Anime and game share the same design

Use clean shapes, selective line detail and controlled value groups. The warm, handmade setting stays legible behind the four distinct heroes. Japanese anime influence is in staging, restraint and expression; it does not require placing arbitrary Japanese landmarks in this world.

Warm limestone #D7C8AA
Cliffs, foundations and well

Pale plaster #EEE4CE
Occupied walls

Dark timber #634B39
Balconies, frames and rails

Garden green #557A53
Awnings, shutters and plants

Slate blue #667D88
Roofs and civic workrooms

Copper #B37848
Service details

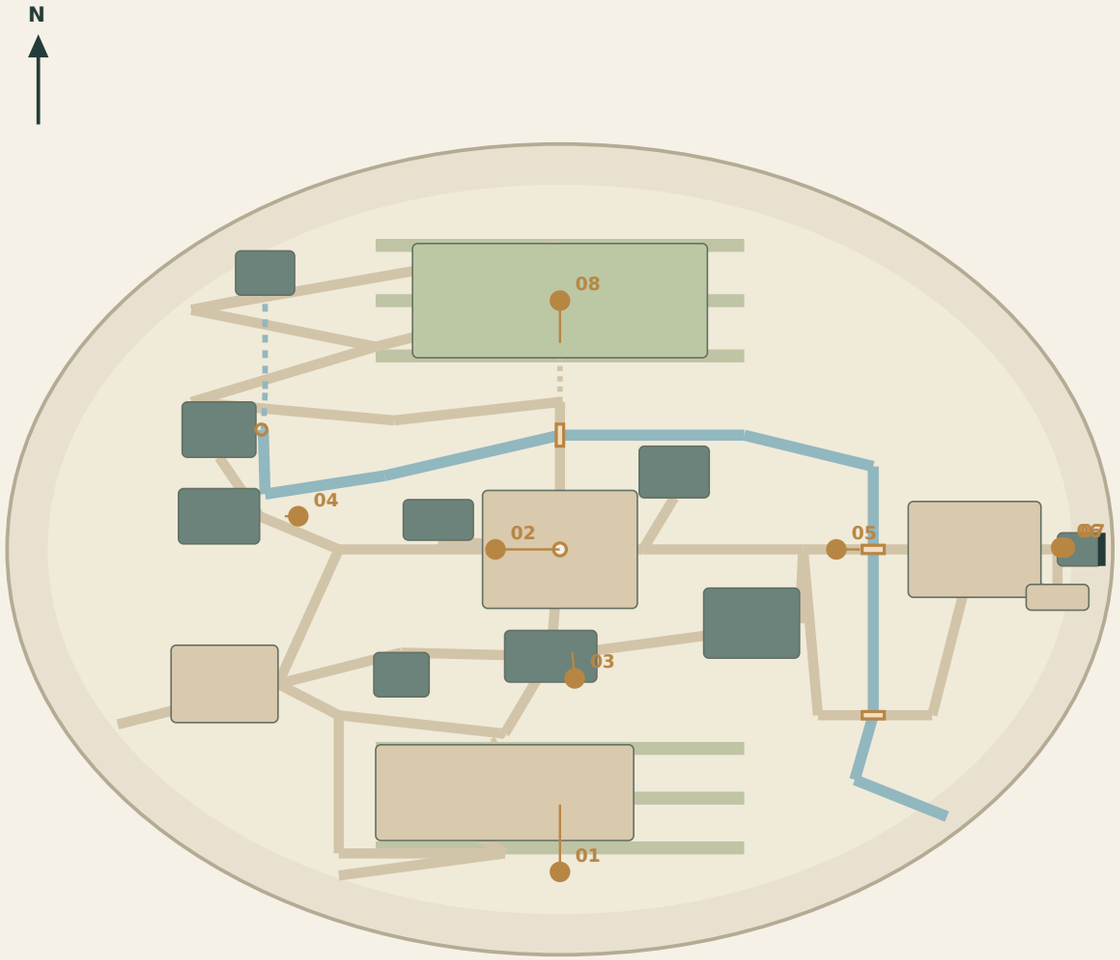

Warm light #E6BC73
Evening windows

Quiet status #7DAD8C
Normal displays, including pilot clues

Lighting and sound

Warm morning comes from the east/right of the south master view; evening reverses that emphasis. Water, tools, footsteps and voices have sources. The ordinary receipt chime stays the same when a clue appears.

Cameras that remember the geography

CAM-01 / South gallery / world master
Workshop left/west, Sunwell center, Bridge and gate right/east, Gardens behind/north.

CAM-02 / Market / looking east
Well foreground, Gate Lane ahead, Bridge beyond, Gate farther east.

CAM-03 / Common porch / looking north
Table bases, Market north, Green awnings.

CAM-04 / Workshop court / looking west
Workshop double doors, Waterhouse north/right.

CAM-05 / Bridge / looking east
Pale flat deck, Canal under deck, Arrival court ahead.

CAM-06 / Gate / interior evidence view
Closed leaves, Manual bar, Relay on right/south wall.

CAM-07 / Service Walk / Snow indication
Flush cabinet, Shallow drain, Slate paving.

CAM-08 / Garden terrace / looking south
Sunwell below, Homes beyond/south, Workshop screen-right/west.

Lens values and target points are starting setups, not permission to move the town. Wider crops may hide a landmark; they cannot replace it. Reverse angles must reverse screen direction consistently.

Episode 1 stays inside

00:00-00:50 / 03, 01, 02

Wake inside the Burrow. Neighbors open shutters, prepare breakfast and share space. Introduce the four through helpful actions.

Boundary: Camera begins on the south interior gallery and looks into the basin. No exterior approach shot.
Clue: None. Give the place uninterrupted warmth.

00:50-01:40 / 13, 14, 15

An already-admitted delivery is counted in the inner arrival court. One cart, one tag, ordinary good service.

Boundary: Gate leaves remain closed in every pilot shot. All cart movement stays inside.
Clue: A second receipt appears for D17; Bot keeps both. No accusation.

01:40-03:00 / 07, 12, 01

Neighbors finish reopening preparations. Gorilla accepts help; Madger shares credit. The repaired bridge opens to normal use.

Boundary: Travel is covered by elapsed-time cuts or a montage; do not show an impossible real-time sprint.
Clue: None added. The bridge repair is ordinary weather recovery.

03:00-04:10 / 02, 15

The shared meal succeeds. After a clear time cut, a short walk with Snow reaches the service area. She holds an indication; Madger listens.

Boundary: The journey between tables and gate takes several minutes in-world. A five-minute episode is not a five-minute day.
Clue: An unfamiliar physical trace by the intact cabinet; source unknown and no maintenance booked.

04:10-04:50 / 02, 03

Return after another time cut. The four enjoy the table and the people around it. Questions can wait for careful checking.

Boundary: Interior evening views only. Complete the small character changes.
Clue: Bot retains both observations without claiming a link.

04:50-05:00 / 14, 15

The same closed, barred gate from inside. The empty vestibule receives another D17 acknowledgment and the familiar chime.

Boundary: No reverse angle through the gate, silhouette outside or villain cutaway.
Clue: An unexplained contradiction. Cause, attacker and mechanism remain unassigned.

The same Burrow in the game

One home map

Use MADGER-BRW-HOME as the stable world ID. Import the location anchors, route graph and crossings from the JSON. Loading zones may divide the map; they may not rearrange it.

Preserve the established controls

Down, S, downward swipe and BURROW dig through authored soil with a dirt trail and emergence. Airborne Down retains descent. Foundations, stone and utilities block digging. Do not silently rebalance the existing Expedition course.

Existing adventure courses

Overgrown Burrow, Forgotten Works and Crystal Grotto retain their established game layouts. Their precise connection to the home settlement is reserved for a later volume. A course name does not make its obstacles the home town's streets.

Scale and engine axes

World units are metres: +X east, +Y north, +Z up. A Y-up engine maps (x, y, z) to (x, z, -y). Use one explicit conversion at import; do not mirror signs or invert east/west.

Earlier room concepts, fixed homes

Workshop / BRW-07

Training Den / BRW-08

Intelligence Room / BRW-09

Strategy Chamber / BRW-09 comparison table

Rescue Den / BRW-11

Trading Post / BRW-10

Creator Studio / BRW-16

Trophy Chamber / BRW-16 archive wall

State is separate from geography

Store canon version and story events independently from score, upgrades and difficulty. A replay does not rebuild the settlement. Gameplay power-ups and respawns do not establish story-world immortality.

A world that grows without drifting

Permanent baseline

Stable IDs, coordinates, elevations, door directions, landmarks and infrastructure relationships remain fixed across content. Keep each published version so old scenes can be understood in their proper state.

Additive growth

A new resident gets a character entry and home/work links. An unused interior room gets a floor plan before first appearance. A new district attaches through a documented boundary without moving the existing town.

Changes caused by adventures

Record damage, repairs, discoveries, new relationships and changed access as dated events with before/after states. Name who witnessed it and who knows. A scene may show a different state; it may not silently rewrite the past.

Deliberate revisions

Patch: clarify wording. Minor: compatible additions. Major: an owner-directed retcon with reason and migration notes. A generated image never overrules the Bible merely because it looks attractive.

BRW-X01 / West emergency door

Fixed closed threshold; inspected emergency provision. Route beyond it remains unassigned and offscreen.

BRW-X02 / Southeast treatment/service access

Fixed service threshold; not a free public tunnel or an Episode 1 adventure route.

BRW-X03 / East exterior threshold

Fixed boundary; exterior roads/lands to be added later without moving the gate.

Still deliberately undefined

Exterior lands and political map; attacker identity and method; detailed unseen tunnels; every resident's biography; exact hero origin dates. These are future entries, not blanks that individual scenes may fill at random.

A repeatable production method

Build once, reuse

Create a greybox from the map, then a reusable environment model and verified camera plates. Produce the anime backgrounds from these same locations. Save day, dusk and night lighting as states of the same set.

Art has a reference chain

Every asset carries world version, location ID, camera ID, time/weather state and visible event state. The measured map outranks atmosphere art. Keep door positions, railings, windows, cabinet side and canal crossings on a continuity sheet.

Stable image-based animation

Hold bodies and backgrounds during dialogue. Mouths are separate controlled patches; expressions and action poses change only when the story calls for them. No whole-frame rerolls to manufacture movement. Use deliberate cuts and motivated face close-ups.

Check before rendering

Match the camera orientation and visible route. Verify character scale, approved designs and voices. Confirm the correct light/state and that the image actually supports the scene's action.

Check the episode

No camera or visible ground outside the Burrow. No premature villain, attack or red-alarm escalation. Clear time cuts between distant places. All four heroes make meaningful choices; residents remain participants.

Check before game integration

Walk the map and bypasses. Test collision at doors, stairs, rails and soil boundaries. Confirm scene IDs survive save/load. Validate the canonical layout separately from combat balance and course timing.

The fixed location register

ID	LOCATION	CENTER (E, N, UP)	FOOTPRINT	LEVEL
BRW-01	Sunwell Market	(0, 0, 0)	84 x 64 m	0 m
BRW-02	Common House & Tables	(-5, -58, 0)	50 x 28 m	0 m
BRW-03	Hearth Terraces	(-30, -132, 12)	140 x 52 m	+12 m
BRW-04	Garden Terraces	(0, 135, 12)	160 x 62 m	+12 m
BRW-05	Spring House	(-160, 150, 18)	32 x 24 m	+18 m
BRW-06	Waterhouse	(-185, 65, 0)	40 x 30 m	0 m
BRW-07	Gorilla White's Workshop	(-185, 18, 0)	44 x 30 m	0 m
BRW-08	Training Court	(-182, -73, 0)	58 x 42 m	0 m
BRW-09	Records House	(62, 42, 0)	38 x 28 m	0 m
BRW-10	Storehouse & Trading Court	(104, -40, 0)	52 x 38 m	0 m
BRW-11	Care House	(-86, -68, 0)	30 x 24 m	0 m
BRW-12	East Bridge	(170, 0, 0)	12 x 4.5 m	0 m
BRW-13	Inner Arrival Court	(225, 0, 0)	72 x 52 m	0 m
BRW-14	East Gate	(282, 0, 0)	24 x 18 m	0 m
BRW-15	Service Walk & Gate Relay	(270, -26, 0)	34 x 14 m	0 m
BRW-16	Makers' Room & Archive	(-66, 16, 0)	38 x 22 m	0 m

Footprints describe building shells, neighborhoods or activity areas as identified in the place sheets. A district envelope is not a solid building. Interiors are topology diagrams until a detailed room model is added. East Gate details and the named crossings remain exact.

Authority, sources and the next addition

Created in this edition

The measured 600 x 440 m layout, location registry, routes, levels, fixed crossing count, floor-plan relationships, camera registry and growth protocol. These are the new foundation commissioned by the owner.

Retained from established work

The four heroes and their corrections; the warm interior settlement; west workshop, north gardens, south homes and east threshold; practical civic systems; subtle unexplained clues; approved voice identities.

Superseded for future production

Earlier schematic geography and inconsistent generated backgrounds. Road views beyond the gate are excluded from Episode 1. The lantern rescue / Warden pilot storyline does not define this home canon.

What this delivery changes

It creates the World Bible and reusable map data. It does not regenerate the pilot, update the live game, rename existing assets or publish to GitHub. Those adaptations should reference this edition when they are next produced.

Owner instruction / 19 Oct 2026

Establish a permanent, expandable shared MADGER world; interior first; all of Episode 1 inside.

A Good Day / R6 production bible

Prior provisional world, character arcs and practical systems. The old diagram was schematic.

Animation Project R6 / version 9

Archived production and approved voice references. Voices and character designs remain authoritative.

MADGER 3D Expedition / GitHub

docs/game-expedition.md at a0e7141. Existing controls, companion roles and character corrections; no existing build modified.

Next entry template

ID / name / district / coordinates / footprint / doors / routes / utility connections / daily purpose / first appearance / before and after state / who knows / source / canon version.
